

Dry cleaning & Laundry solutions

Providing sustainable solutions to deliver long-term value for our customers worldwide.

making the difference!

A great choice for our planet

UNISEC is here to help you find a path to a sustainable future. There are many opportunities to make a positive contribution by choosing more efficient and energy-saving equipment – which is good news not only for the planet but also for your business's bottom line. It is time to make the right choices.

Planting one seed at a time

As you navigate the challenges of the future, selecting the right partners is essential for achieving your sustainability goals. We are dedicated to earning your trust through our sustainable actions and practices. Our goal is to be your reliable ally in creating a sustainable future.

We aim to always **#makingthedifference**

making the difference!

A sustainable future

At **UNISEC**, our mission is to simplify and enhance our customers' work-life, making it more profitable and genuinely sustainable. Sustainability is embedded in our strategy, culture, and daily operations. Guided by the Sustainable Development Goals (SDGs), we continuously work to improve sustainability across our customers' value chain every day.

Circular approach

Recycling

Digital Transformation

Innovative solutions

Natural resources are precious. Our ecosystems depend on maintaining a fine balance between what we take out and what we put back. The future of the planet relies on our ability to create smart solutions that use resources efficiently.

UNISEC solutions ensure you can focus on your business, confident that you are operating in the most sustainable way possible.

**Sustainable
laundry solutions**

Garment care made effortless

Maintaining pristine linen requires significant use of water, energy, and detergents. **UNISEC** leverages cutting-edge technology and innovation to create resource-efficient washer extractors and dry-cleaning machines with minimal environmental impact. Our solutions enable customers to excel in business sustainability.

MultiSolvent Dry Cleaning

UNISEC offers two **MultiSolvent** equipment **JUNIOR HCM & ECOPLUS JM**

Energy-Efficient

Design

Environment

JUNIOR HCM

(with distill)

Adapt the Equipment to Your Standards

The **UNISEC** JUNIOR HCM stands out as one of the most Adaptable and Sustainable models on the market. from 8 Kg machine up to 70 kg

This innovative design makes it adaptable to nearly all Multi-Solvent options available, making it an ideal choice for those who aim to achieve exceptional cleaning results while also prioritizing **Environmental Sustainability**

Up to 35% faster drying cycles thanks to the **UNIDRY** control sensor

ECOPLUS JM

(without distill)

ECOPLUS utilizes a closed-circuit filtration system rather than distillation, resulting in potential savings of up to 45% on utility costs.

Closed circuit filtration system prevents the use of a distillation

By being able to choose between water or air cooling you can be more than 40% more energy efficient

Perchloroethylene Dry Cleaning

UNISEC offers one of the most powerful machine for the perfect results | **JUNIOR M**

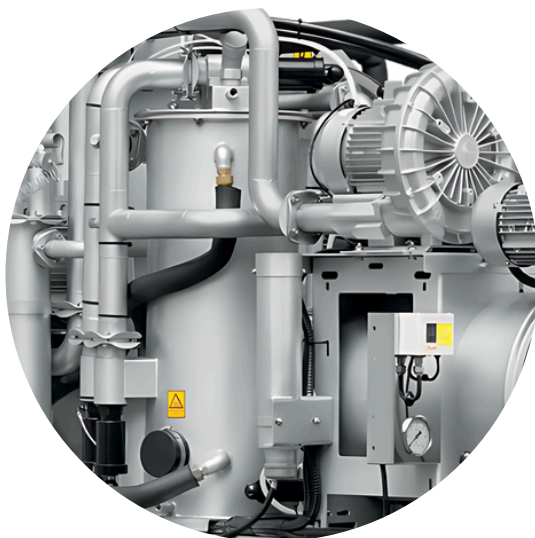

Perfect cleaning result

Cares for your garments and delivers exceptional results.

Safety and protection of the environment and user

UNICARBON effectively adsorbs residual solvent gases in both the drum and drying chamber, reducing their concentration to below **2 g/m³** before the loading door is opened.

This system significantly lowers solvent vapor emissions in the workspace, ensuring environmental protection and safeguarding the operator throughout the machine's lifespan.

Design

Environment

Durability & strenght

Our **JUNIOR M** is built to last; we have machines that have been on the market for 30 years.

The **JUNIOR M** can recycle 99% of the solvent after each wash, ensuring longevity and sustainability.

Additionally, it features a smart dosing system to minimize detergent usage.

Our certification showcases our excellence |

Up to 35% faster drying cycles thanks to the **UNIDRY** control sensor

Efficient and economical

UNISEC | laundry equipment reduces the total cost of ownership and minimizes the environmental footprint throughout its lifecycle, making your business truly sustainable.

UNISEC Washer Line

Reducing water retention in the washer leads to yearly savings of **€3000** on drying expenses because of decreased energy usage.

Saving Dewatering

The clothing requires 35% less time and energy to dry.

High spin speed

The cycle is completed much faster due to the high spin speed.

Durability

The equipment has a longer lifespan, less turnover of machineries

All of our equipment is made from stainless steel and the highest quality components.
